***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Claims 1-35 are allowed. The claims are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose all of the limitations as particularly recited in each of the independent claims 1, 10, 20, 28, 32, 34, and 35. Particularly, none of the prior art teaches comparing the last fractional pixel position to the fractional threshold and writing a complete pixel to overlap onto a first complete pixel position of the track. The remaining claims 2-9, 11-19, 21-27, 29-31, and 33 are allowable with their respective parent claims. The closest prior art only teaches writing on a label region of an optical disc using pixels, but does not refer to the comparison of the last fractional pixel with a fractional threshold as explained further below.

Drisko, US Patent 4,718,784 teaches pixels that overlap, but does not teach the given fractional threshold.

Van Brocklin et al., US Patent Publication 2005/0013964 teaches optically writing using pixels on a label, but does not teach overlapping pixels.

Pettigrew et al., US Patent Publication 2004/0141385 teaches optically writing to a label side of a disk using pixels, but does not teach overlapping pixels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
